Bass Construction Company Announces the Grand Opening of the Fort Bend County Tax Office

Richmond, TX – On May 8, 2009, Fort Bend County is hosting the official grand opening of the new tax office building at 9:30 a.m.. This will be located at 1317 Ransom Rd., Richmond, TX 77469. There will be a short ribbon cutting ceremony with refreshments; many county leaders will be in attendance.

The new tax office is located on the southwest corner of the 40-acre tract of property across from the Fort Bend County Jail. This is the second building completed on this piece of property. The Precinct 1 Facility was completed and occupied in August 2008 (also built by Bass).

Team Players: Don Brady – Director, Facilities Management & Planning (Fort Bend County), Bass Construction Co., Inc. (General Contractor), Tim Willert (Design Build Manager – Bass), Russell McCown (Project Manager – Bass), Nick Favre (Superintendent – Bass), Dan Barnum / HBL Architects (Architect), SCA (Structural Engineer), Kaluza & Associates (Civil Engineer), Jones Engineering (MEP engineer)

“The design build process the County used to streamline these projects has worked brilliantly, said Buck Bass. “Not only did the County receive the building they were aiming for, but the entire team managed to keep the project under the budget that was set aside in the 2006 bond program approved by voters.”

Over the last 50 years, Bass Construction has been part of shaping the character of the communities with which we work. In that time, we’ve seen these areas literally come to life through the structures we’ve built. It is an honor to be a part of these projects that will serve Fort Bend County in so many ways for years to come.
